

Pedro Pedro STUDIO

spring summer 24

Pedro Pedro Studio is a brand made by a Portuguese couple living in Porto. They base their collections on an urban, minimalist and genderless aesthetic with handcrafted details inspired by Portuguese folk in a contemporary form. The studio presents a genderless product believing that all items are for all consumers who identify with the aesthetics and message of the brand. They also intend to support partnerships with the local community and independent artists, uniting various forms of artistic expressions like sculpture, photography, painting, illustration, graphic design and music to contribute to the development of the brand it self and the ideal of taking the collections, qualitative products and the community to a next level. Pedro and Ricardo intend to be a beacon of sustainability, whether in the choice of materials with which they guarantee the use of dead stock giving a new cycle to existing materials, the use of natural and organic fibers with little environmental impact. They also highly value the circular economy, fostering a very close relationship with suppliers, partners and brand consumers, believing that this is the responsible future and path to follow.
